

Full / Half-Duplex Selection:

There are two modes of data transmissions, full-duplex and half-duplex transmission. The data can be transmitted in both directions on a single carrier at the same time when you select Full-duplex mode. But the data can only be transmitted in one direction on a single carrier at the same time when you select Half-duplex mode. You may select Full or half-duplex mode according to your equipment requirement.

You can configure full or half-duplex NS-200F Series via DIP –Switch. (Default: full-duplex).

| DIP-Switch | Description |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
|  | <p>Full-duplex (Default)</p> <p>Transmission Distance: 2 km</p> |
|  | <p>Half-duplex</p> <p>Transmission Distance: 412m</p> |
